***(4) Catholic University of Leuven, Leuven, Belgium***

# Radio telescope UTR-2

frequency range – 8 -32 MHz  
frequency resolution – 12 kHz  
time resolution – 0.1ms  
square – 150,000 sq.m  
beam – 25`x25`

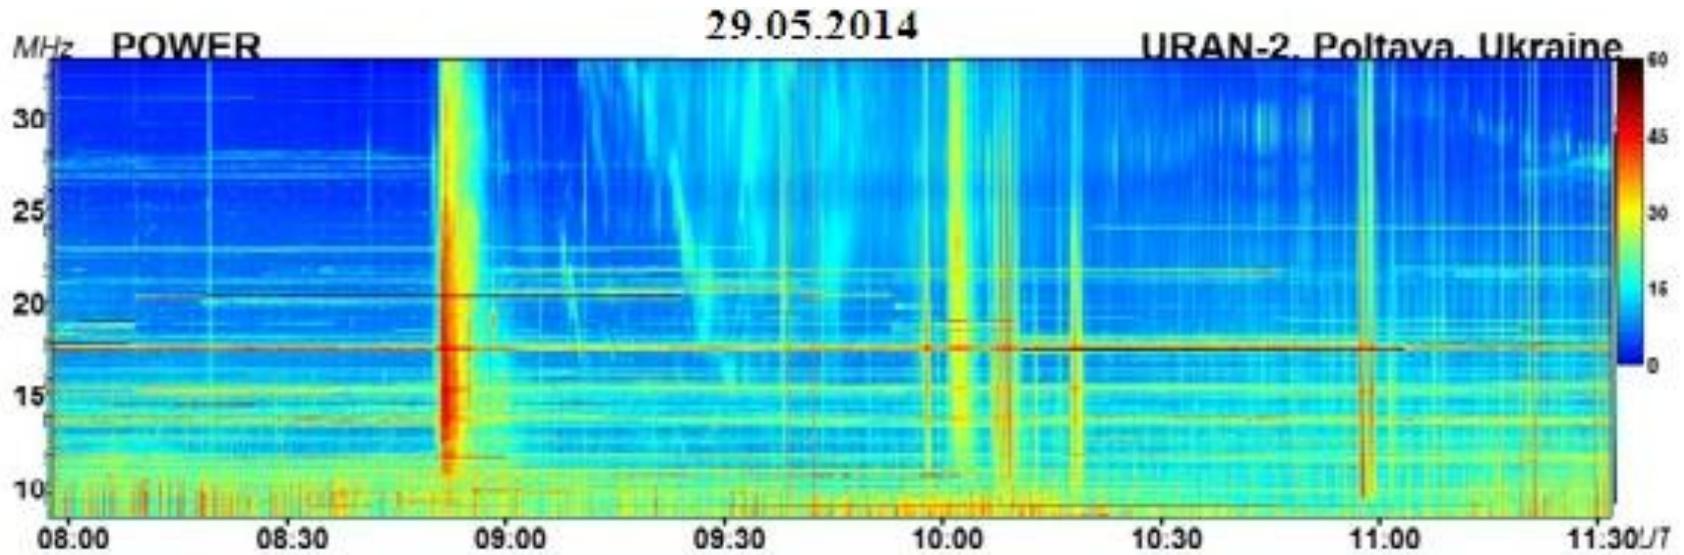

West-East arm

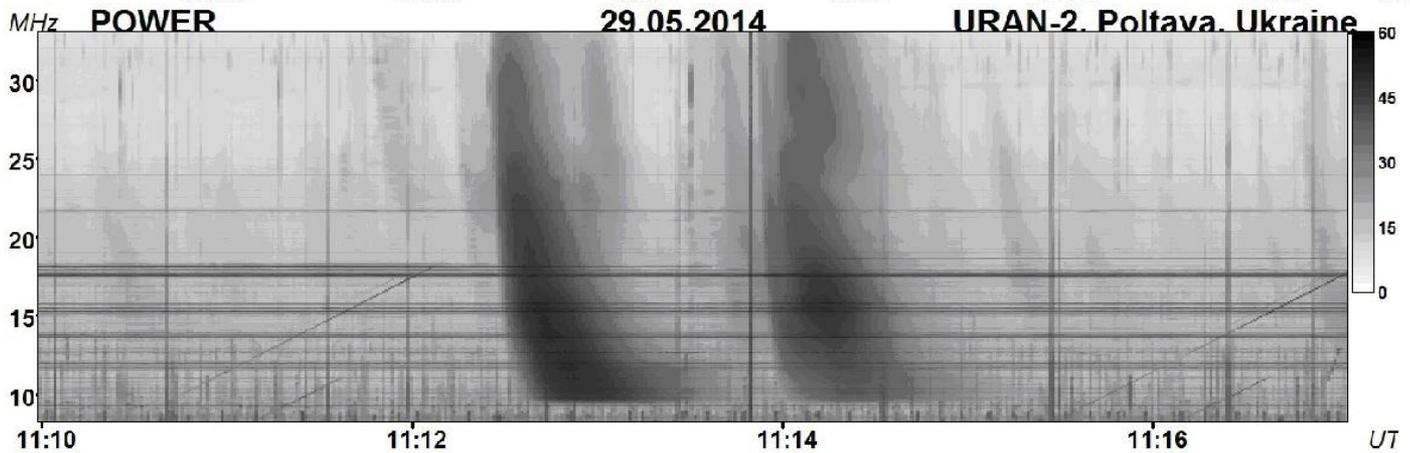

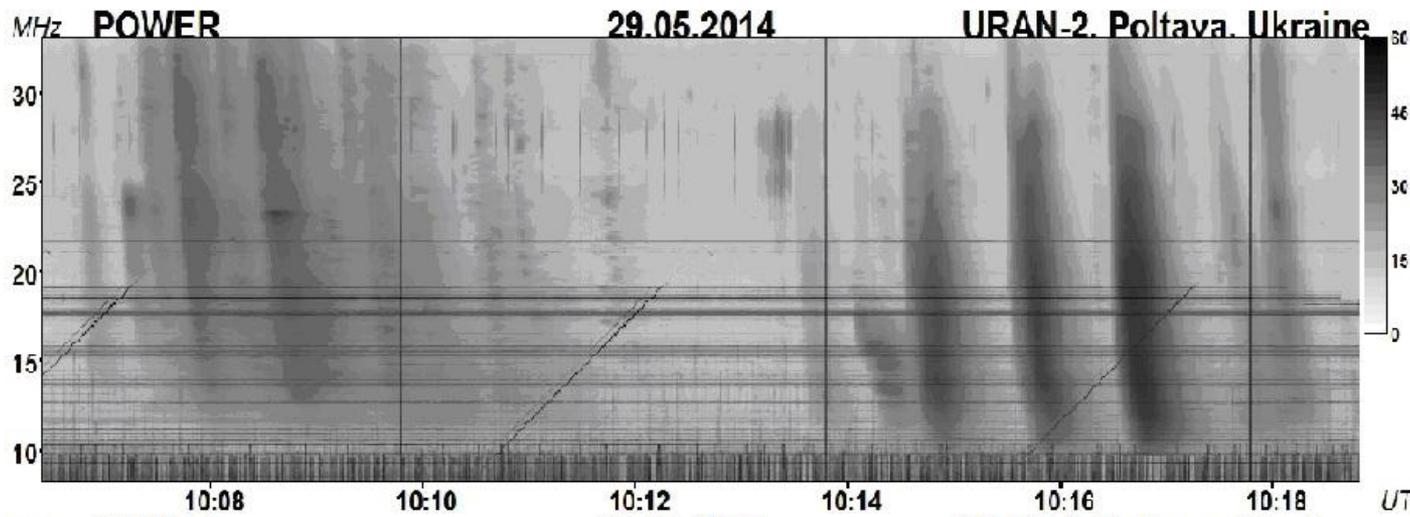

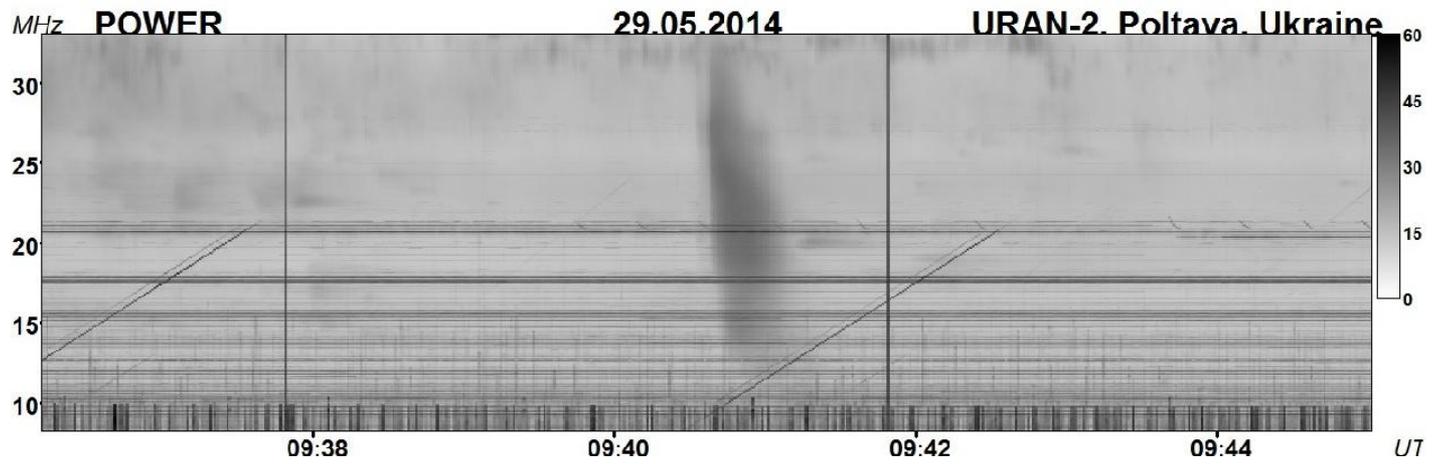

North-South arm

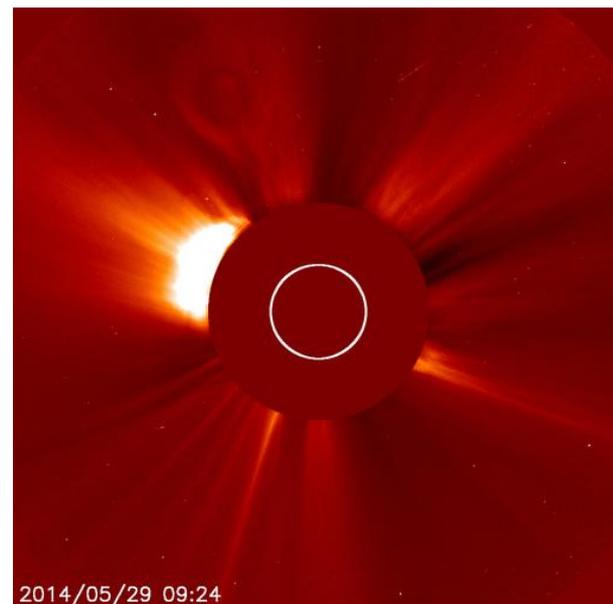

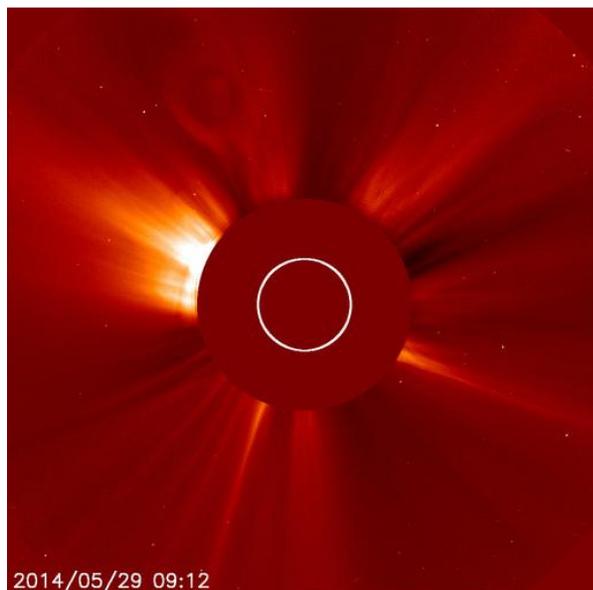

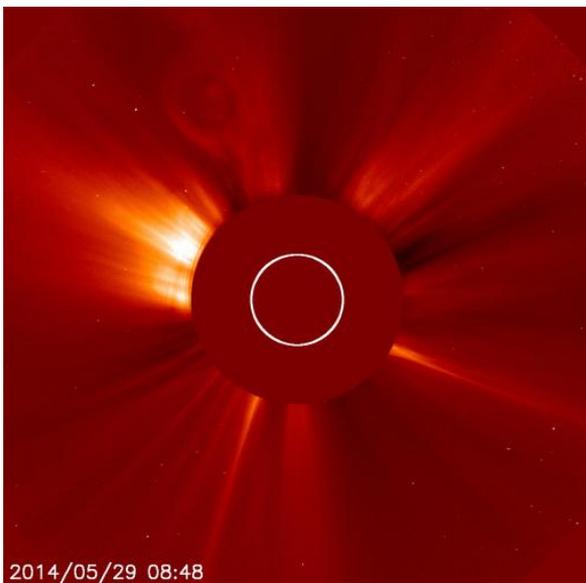

Classical consequence of bursts:

Group of type III bursts, type II bursts and type IV burst

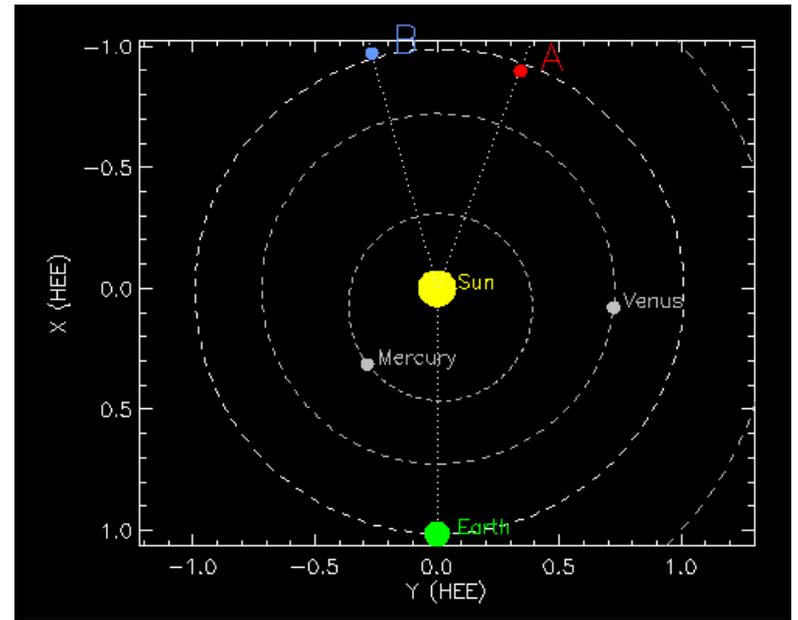

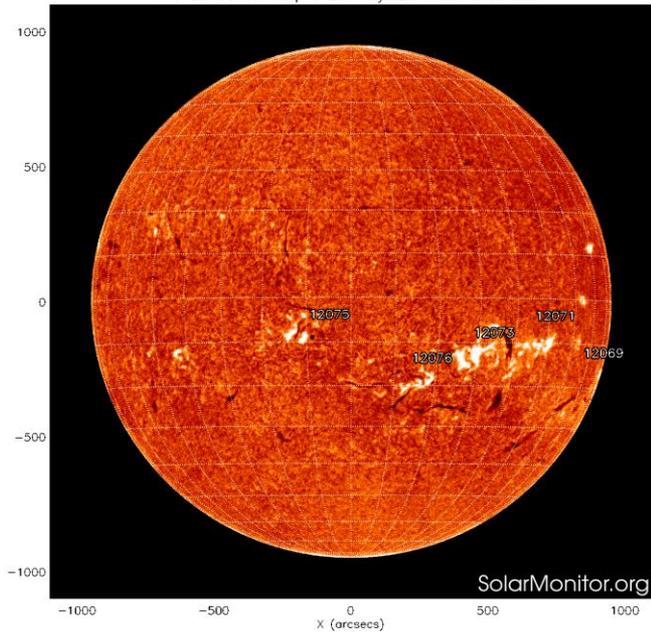

There are some type III bursts with radio fluxes above 100s.f.u.

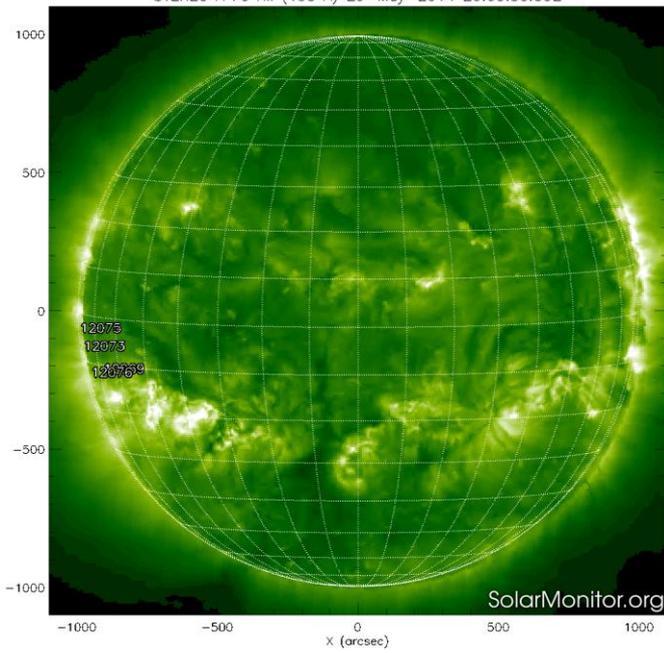

# CME according to SOHO

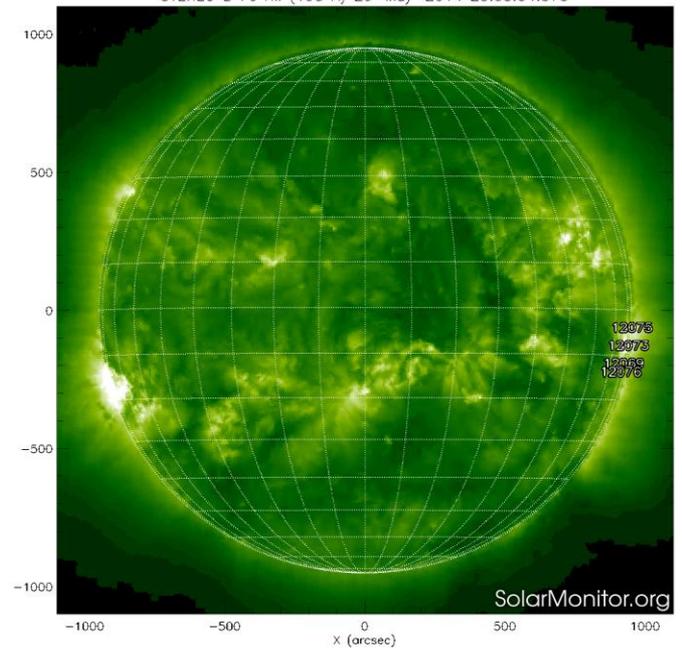

Kanzelhoehe H-alpha 29-May-2014 06:17:56.000

STEREO A Fe XII (195 Å) 29-May-2014 20:05:30.832

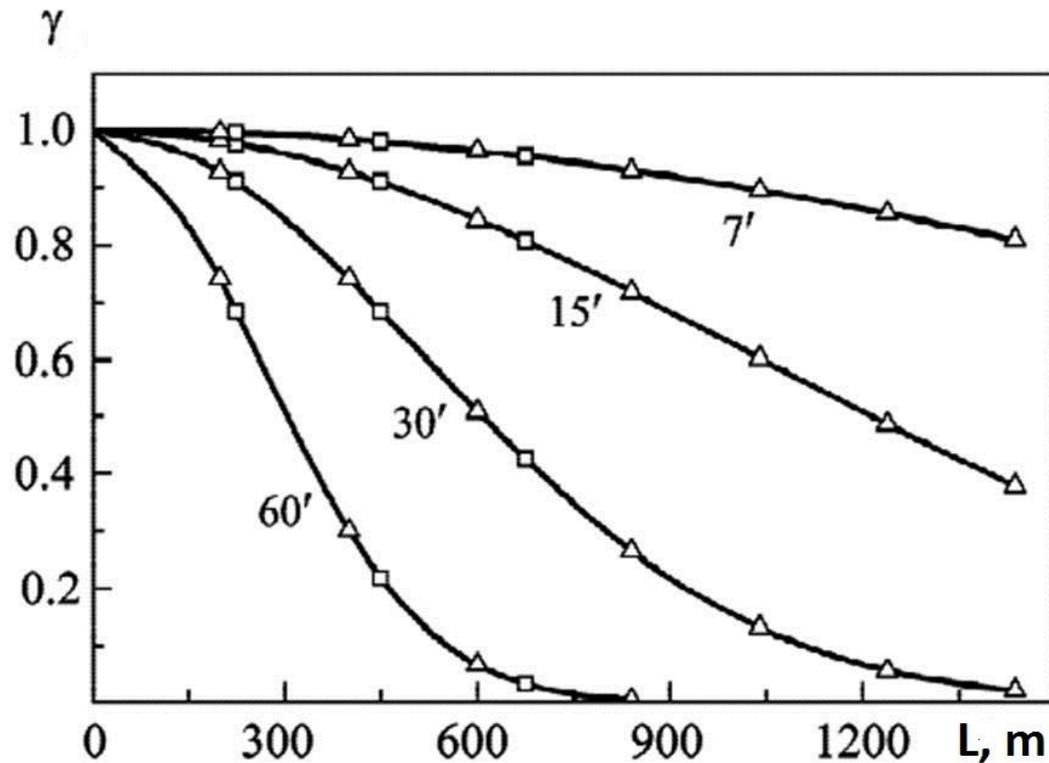

STEREO B Fe XII (195 Å) 29-May-2014 23:05:54.573

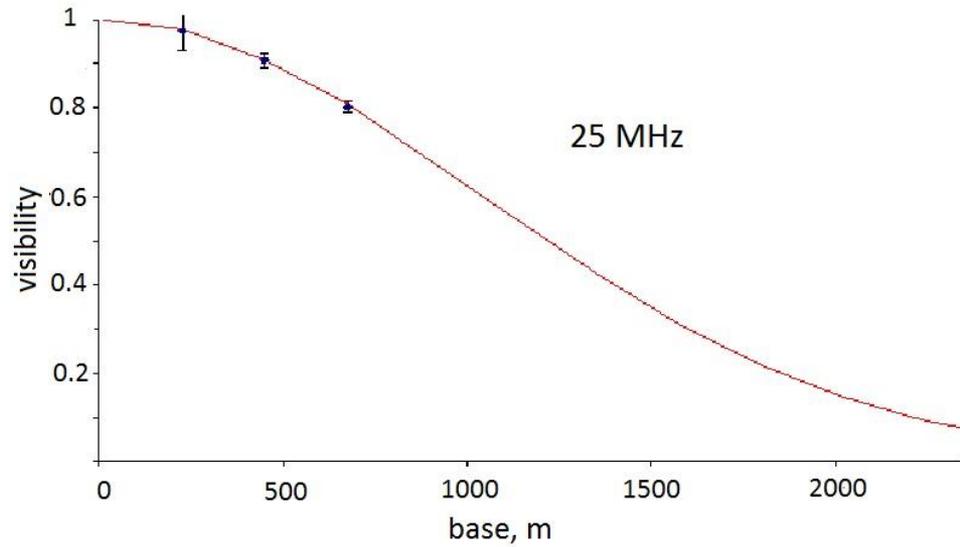

## Definition of source sizes on visibility function

$$\gamma = \exp\left[-\left(\frac{\pi\theta L}{2\lambda\sqrt{\ln 2}}\right)^2\right]$$

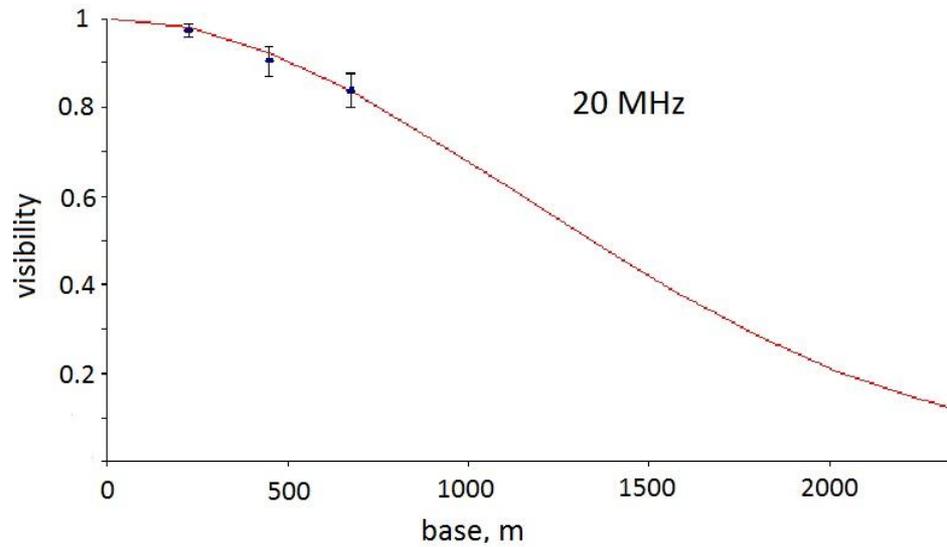

$\theta$  - size of source,  $\lambda$  - wavelength,  $L$  - baseline of interferometer

# Type III burst at 9:41 UT on May 29, 2014

W-E size 14 arcmin

W-E size 16 arcmin

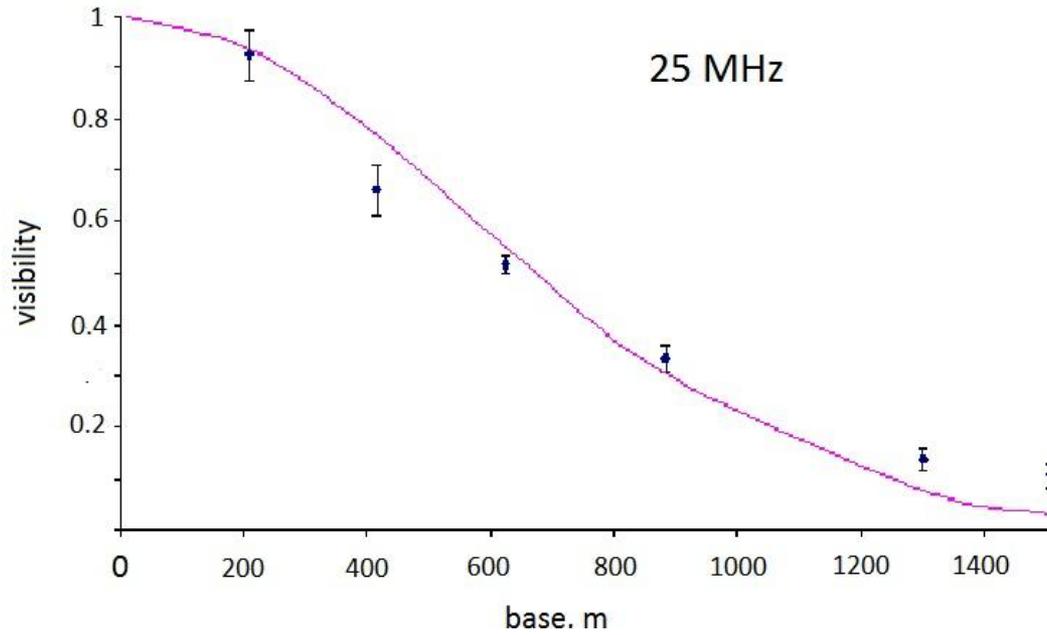

## 25 MHz

time, UT	size, arcmin	duration, s	velocity	Distance, arcmin
9: 40:43	14	10	0.2c	50
10:07:47	29	18.5	0.25c	39
10:08:36	28	19.6	0.21c	39
10:14:46	22	9.8	0.3c	41.5
10:15:42	22	11.9	0.26c	43
10:16:38	22	13	0.25c	41.5
11:12:33	20	11.3	0.27c	42.5
11:14:04	21	17.5	0.17c	41.5

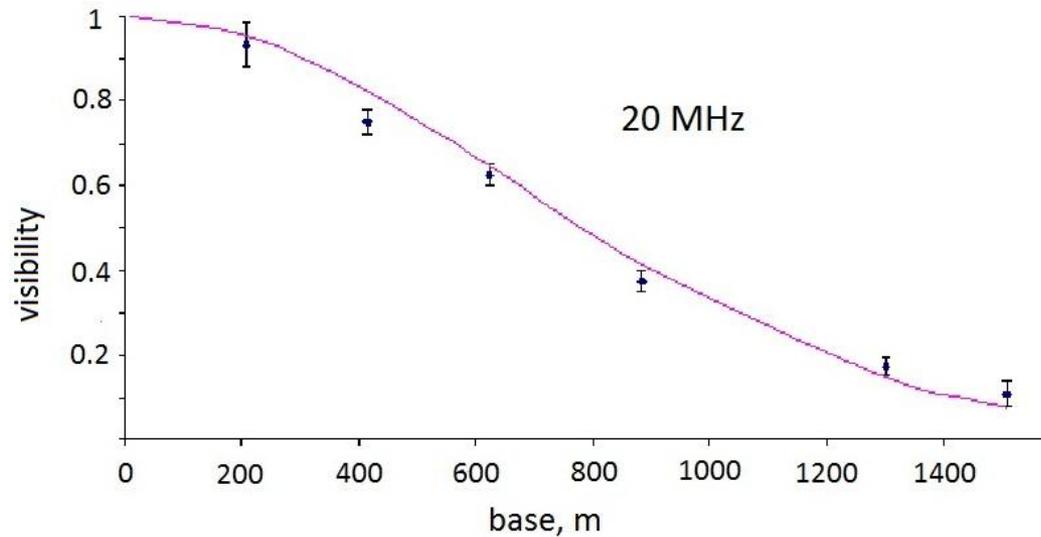

## 20 MHz

time, UT	size, arcmin	duration, s	velocity,c	Distance,arcmin
9: 40:43	16	16	0.15c	55
10:07:47	26	14.1	0.22c	49
10:08:36	27	20.7	0.2c	49
10:14:46	27	13.1	0.26c	47
10:15:42	25	11.9	0.23c	45.5
10:16:38	27	16	0.23c	44.5
11:12:33	24	12.4	0.29c	47
11:14:04	23	15.5	0.21c	46

# Type III bursts on June 2, 2014

N-S size 27`

N-S size 29`

## Definition of source position

$$\sin \Delta\theta = \frac{\Delta\varphi\lambda}{2\pi L}$$

$\Delta\theta$  - distance from the Sun,  $\Delta\varphi$  - phase jump,

$\lambda$  - wavelength,  $L$  - baseline of interferometer

Obtained heights corresponds to radio emission of type III bursts at the second harmonic in the Newkirk model of solar corona

## Brightness temperature of type III bursts

$$T_b (^{\circ} K) = 5.5 \cdot 10^3 \frac{\lambda^2 S(Jy)}{\theta_W \theta_N}$$

Discussed type III bursts have brightness temperature

from  $2 \cdot 10^9 K$  to  $4 \cdot 10^{10} K$

Thank you for your attention !
